

Can We Cope with the Complexity of Reality?

Why Craving Easy Answers Is at the Root of our Problems

Rolf Jucker

Education for a viable future has never been more important than in our era of climate change, fake news, self-illusions, and political upheaval. Whether humanity will have a dignified future hangs in the balance. The urgency of finding sound solutions to a number of complex problems is obvious. We can't really allow ourselves to get it wrong, but the temptation to fall for easy, convenient answers is considerable. This book focuses on emerging insights from various fields which allow us to collectively build evidence-based and wise solutions. This requires us to clarify how to arrive at a sound understanding of reality, which belief-systems and ideologies impede this understanding, and

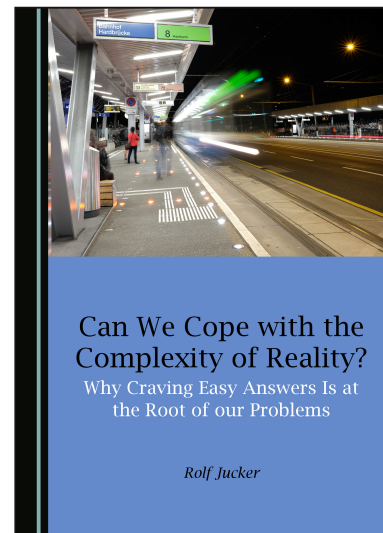

which issues need to be addressed as a matter of urgency.

Dr Rolf Jucker is currently Director of the Swiss Foundation for Nature-based Education (SILVIVA) and a learning for sustainability expert, having previously served as Director of the Swiss Foundation for Environmental Education from 2008 to 2012. Having gained an MSc in Education for Sustainability (EfS), he has worked extensively on education for a viable future and published widely on the subject. He is the author of *Do We Know What We Are Doing? Reflections on Learning, Knowledge, Economics, Community and Sustainability* (2014).

Are you looking for a publisher for your scholarly work?

Cambridge Scholars Publishing is an academic publishing house committed to providing a forward-thinking service that champions original thinking and puts our authors at the heart of everything we do. We have 6,000 titles in our catalogue across a range of subjects; our historic focus has been on the Social Sciences, but we have burgeoning collections in the fields of Health Sciences, Life Sciences and Physical Sciences.

Our international Editorial Advisory Board members, noted for their expertise, have a wealth of collective publishing experience and help to shape the strategy and content of our publications in these fields. We welcome all proposals for our four key subject areas of Health Sciences, Life Sciences, Physical Sciences and Social Sciences that champion original thinking.

We provide a dedicated author service, with no cost to the editor or author, complimentary copies, and a substantial

author discount that can be used on our whole back catalogue. We also offer a generous royalty structure, where authors receive royalties from the very first sale.

In addition, our publishing process is faster than most other publishers, usually being less than six months after final submission without compromising either the quality of the publication or the balance between editorial guidance and the author's control over the integrity of their original argument.

Our publications (published in hardback and also available in e-book format) are marketed worldwide and sold through international booksellers and distributors including Amazon, Blackwell, Baker & Taylor, YBP and Ingram, and are widely purchased by academic libraries. We have an ever expanding portfolio of distribution partnerships in key geographical territories such as the USA, China, India and the Middle East.
